

We are pleased to announce that Senior Land Use Specialist Gail Hatter- Crawford has recently been certified by the Corps of Engineers as a Construction Quality Control Manager for Corp of Engineers and Naval Engineering Command Facilities projects. To receive this certification, Ms. Hatter- Crawford completed class work and passed testing on the objectives of construction quality management, which establishes quality requirements for projects and assures quality throughout the construction process. The certification course was coordinated and sponsored by the Associated General Contractors of America.

This certification gives Ms. Hatter-Crawford and Lombardo and Gilles a unique ability to assure that your projects are completed in the best way possible and to give you the quality results you desire. While most projects do not require approvals or coordination with the Corp of Engineers or Naval Engineering Command Facilities, the essential components of project and construction quality management are applicable to any project regardless of size.

The Land Use Department at Lombardo and Gilles is ready to assist you in any land use or permitting issue including building and grading permits, environmental review, general plans and zoning or subdivisions. Our range and depth of experience, including our attorneys and land use specialists, have proven successful in managing a full range of land use projects from concept through permitting and construction.
